'Loving to Learn, Learning to Love'

Calculation Progression

Key Stage One

Aims:

- ★ To share our calculation progression in Maths through KS1.
- ★ To share the methods that we use for addition, subtraction, multiplication and division.
- ★ To share the practical and visual resources that we use to teach calculation in KS1.
- ★ To share resources that will help you to support your child/ children at home with calculation.

<https://www.youtube.com/watch?v=M2dhD9zR6hk>

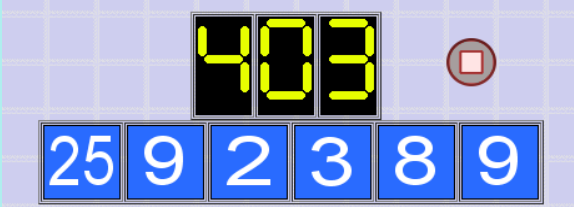

"That is too hard!"

"I don't know where to start."

"I didn't have time."

"I'm not very good at Maths."

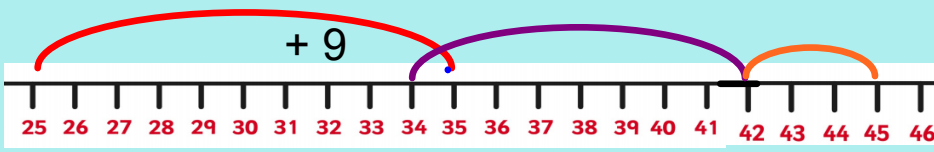

prior learning

I know $10 \times 4 = 40$
I know $40 \times 10 = 400$

1 2 3 4
visuals

methods

1 2 3 4
visuals

methods

prior learning

I know $10 \times 45 = 450$
So 9×45 is 45 less than 450

methods

$45 \times 9 = 405$

$- 2 = 403$

Why is progression in calculation important?

It gives the children the building blocks that they need to be successful in Mathematics and supports them to develop their calculation methods from EYFS to Year 6... and beyond!

Why is progression in calculation important?

$$12 + 5$$

$$134 + 23 =$$

100s	10s	1s
100	10 10	1 1
	10	1 1
	10 10	1 1
		1

	2	6	4	5	9
	3	5	5	4	7
+	6	3	4	3	2
	1	2	5	4	3
					8

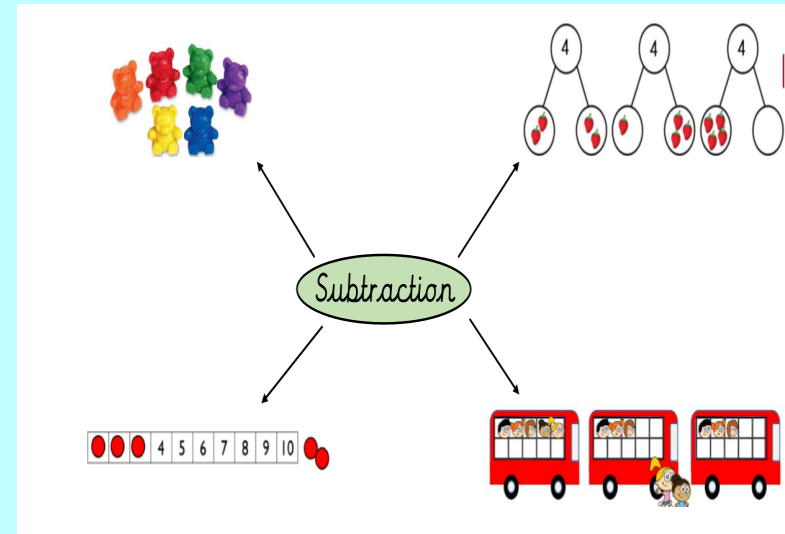

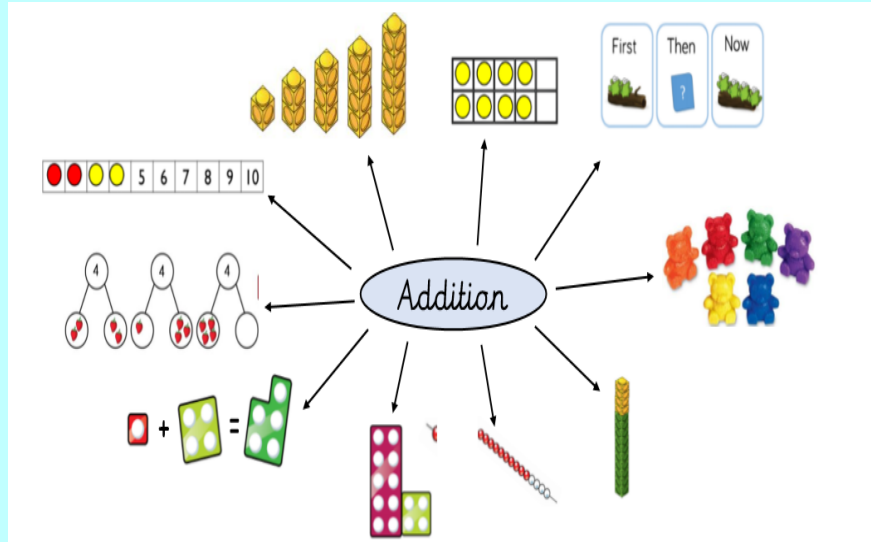

Where the children start with calculation in Reception:

EYFS Key Representations

The diagram illustrates various ways to represent numbers from 1 to 10. On the left, ten frames are shown for numbers 1 through 5, each with a different object (teddy bear, ladybugs, strawberries, grapes, and flowers). In the center, there are various counting objects: a red die, colorful blocks, yellow towers, blue pencils, and a red die with five dots. On the right, ten frames are shown for numbers 6 through 10, each with a different object (red and yellow dots). Below these are five hands showing fingers for numbers 1 to 5, and three number bonds for the number 4, each with a different object (strawberries).

Early Learning Goal: Children count reliably with numbers from one to 20, place them in order and say which number is one more or one less than a given number. Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer.

Early Learning Goal: They solve problems, including doubling, halving and sharing.

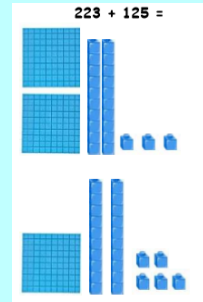

They use practical and pictorial throughout each year group!

practical

$223 + 125 =$

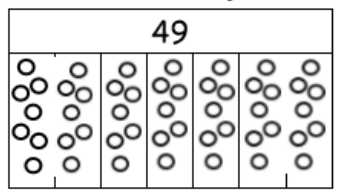

100s	10s	1s
100	10 10	1
100	10 10	1
100	10 10	1

$300 + 90 + 6 = 396$

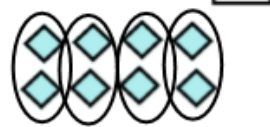

pictorial

$7 \times 7 = 49$

$8 \div 2 = \square$

Part Part Whole

Whole	
Part	Part

Part + Part = Whole

Whole - Part = Part

We also apply our calculation methods to reasoning and problem solving, throughout each year group!

We call them the going deeper fish challenges!

All the dots have fallen off 2 toadstools.

How many different ways can you put them back on?

Both missing numbers are less than 10

$$7 + \square < 7 + \square$$

How many different possible answers can you find?

Year 1  Year 2

read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs

represent and use number bonds and related subtraction facts within 20

add and subtract one-digit and two-digit numbers to 20, including zero

solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$.

Solve problems with addition and subtraction: using concrete objects and pictorial representations, including those involving numbers, quantities and measures

Applying their increasing knowledge of mental and written methods

Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100

Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: \clubsuit a two-digit number and ones \clubsuit a two-digit number and tens \clubsuit two two-digit numbers \clubsuit adding three one-digit numbers

Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot

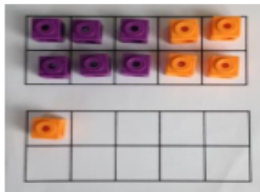

Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.

Numicon

Year 1  Year 2

Repeated Addition Linked to Picture

$$2 + 2 + 2 = 6$$

Drawing Pictures

There were 5 ice cream cones. Each cone had 3 scoops of ice cream in.

How many scoops were there?

5 groups of 3
 $5 \times 3 = 15$

Arrays

$4 \times 3 = 12$

$3 + 3 + 3 + 3 = 12$

Models and Images

There are ___ equal groups with ___ in each group. I have five ___.

Bar Models

3 groups of 4.

$4 + 4 + 4 = 12$

$3 \times 4 = 12$

Repeated addition

$5 \times 3 = 5 + 5 + 5 = 15$

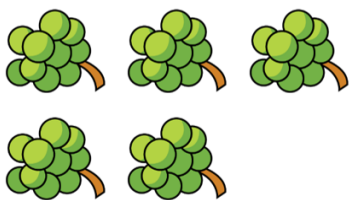

Year 1	Year 2
--------	--------

In a shop, grapes come in bunches of 10

Max wants to buy forty grapes.

Are there enough grapes?

Spot the mistake.

Alex says, "There are 10 equal groups with 2 in each group. There are ten 2s."

Place Value Counters

$23 \times 5 =$

	4	7	2

Division

Year 1

Year 2

solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher

Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers

Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$) signs

Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot

Year 1 Year 2

<p style="text-align: center;">Halving $10 \div 2 = 5$</p> <div style="text-align: center;"> </div> <p style="text-align: center;">Sharing $6 \div 2 =$</p> <div style="text-align: center;"> <p style="font-size: small; margin-top: 5px;">6 shared between 2</p> </div> <p style="text-align: center;">Grouping $6 \div 2$</p> <div style="text-align: center;"> </div>	<p style="text-align: center;">Sharing Objects $15 \div 3 = 5$</p> <div style="text-align: center;"> </div> <p style="text-align: center;">Grouping Objects $8 \div 2 = \square$</p> <div style="text-align: center;"> </div> <p style="text-align: center;">Bar Model $15 \div 3 =$</p> <div style="text-align: center;"> <table border="1" style="margin: auto;"> <tr> <td colspan="3" style="text-align: center;">15</td> </tr> <tr> <td style="text-align: center;"> </td> <td style="text-align: center;"> </td> <td style="text-align: center;"> </td> </tr> </table> </div>	15					
15							

Inverse
 Use of times table
 knowledge and the inverse.
 Eg. $5 \times 4 = 20$ so $20 \div 4 = 5$
 $20 \div 5 = 4$

Finding Fractions of Amounts

$1/3$ of 15 = 5

● ●	● ●	● ●
● ●	● ●	● ●
●	●	●

$2/3$ of 15 = 10

● ●	● ●	● ●
● ●	● ●	● ●
●	●	●

Sharing (Bar Model)

$48 \div 4 = 12$

				●●●●
●	●	●	●	●

Back in my day,
they were units!

$3 + 7 = 10$
 $10 - 3 = 7$

$300,000 + 700,000 = 1,000,000$
 $1,000,000 - 300,000 = 700,000$

Recap!

Why is progression in calculation important?

It gives the children the building blocks that they need to be successful in Mathematics and supports them to develop their calculation methods from EYFS to Year 6... and beyond!

How can I continue to support my child/children with Maths calculation?

- ★ Firstly, thank you - you are doing amazing job with supporting the children with their online/home learning!
- ★ You can use the calculation KS1 progression document and follow the methods when supporting you children with Maths calculation.
- ★ You can use the vocabulary on the KS1 calculation progression document when supporting your children.
- ★ You can join our Maths lesson zooms to see the calculation methods that the children are learning that day!
- ★ You can use the websites provided, that link to our calculation methods, if you want to do anymore Maths activities at home with your children!

<https://whiterosemaths.com/>

We use White Rose Maths to support our planning and teaching in all Year groups so the calculation methods, visuals and practical resources that you see on the activities and videos match those that we use in school.

I will post a document - KS1 calculation progression (with all of the key information from our zoom and slides and some more useful websites) on Seesaw for you to save or print!
